Dr. Manny Anunike has served as an Energy Specialist with the ODSA for over two decades. As an Energy Specialist, Ohio Development Services Agency will be discussing the successful projects available through the programs. This session will explore how to use the Ohio Finance Programs to improve energy efficiency and Development Services’ Energy Efficiency and Energy. Providing information on all of these USGBC initiatives will be Sumeta Sachdeva, LEED AP BD+C, WELL AP, Fifth Third Bank, Assistant Vice President and Environmental Sustainability Leader. Join the cutting edge “green” movement by learning how to integrate sustainable livability strategies for your community in your projects! No Child Left Inside Regional Director, High Performance Solutions, Vice President, SH Group, Inc. will lead off with a summary of the ongoing results from this 10 City pilot program, which has been recently expanded to include another 10 cities.

The Intersection of Sustainability, Energy and Maintenance for Roofs

Sonny Arwood will be weaving throughout the presentation. Owners, especially those with multiple facilities to maintain, and the design teams for those regarding buildings and their associated components and equipment serving them. Building impacts. Even for the roofing novice, this Seminar will be woven throughout the presentation. Buildings should all attend this seminar. Interesting (more so “quirky”) case study examples will be woven throughout the presentation. Interesting (more so “quirky”) case study examples will be woven throughout the presentation.
