Earn ACHE F2F CEs, AIA LU/HSWs, GBCI CEs and PDHs

Heapy Engineering and ACHE of Ohio (American College of Healthcare Executives), are hosting the 8th Annual Symposium on Sustainability in Health Care. The SSHC is an educational event with Trade Expo for Healthcare providers and industry partners. ACHE of Ohio is providing 3.0 Face to Face hours via Sessions at the SSHC.

- A Keynote Luncheon with **Bill Browning, Founding Partner of Terrapin Bright Green**. He is one of the green building and real estate industry’s foremost thinkers and strategists, and an advocate for sustainable design solutions at all levels of business, government, and civil society.

- A **Trade Show** with exhibitors focusing on the Health Care industry runs concurrent with the Symposium.

- **Who should attend**: Health Care administrators, medical practitioners, A/E/C professionals, nursing/clinical staff, medical students/educators, environmental health and safety personnel and facility managers.

- Education Partner: **ACHE (American College of Healthcare Executives)** consists of a thriving group of diverse healthcare leaders representing nearly every type of institution and agency involved in the delivery of health services in Ohio. Members hold positions in hospitals, health planning agencies, physician groups, public health departments, consulting firms, shared service organizations, pharmaceutical and equipment organizations, healthcare associations and health insurers.
NFPA Codes and Standards in the Healthcare Environment Workshop (*additional cost of $99)

This session will provide an overview of NFPA 99, 110, 70, and 101 as they relate to the healthcare environment. Attendees will review the requirements of the codes and learn how to apply them in the healthcare setting. The presenter will discuss the requirements and challenges associated with the codes and examine how they work together to provide a higher level of safety and reliability in healthcare.

**Dave Dagenais BS, CHSP, CHFM, FASHE - Director of Plant Operations and Security, Wentworth Douglass Hospital, Dover, NH**

SESSION A
Joint Commission Resources Program
The adoption of the 2012 editions of the Life Safety Code (NFPA 101) and the Health Care Facilities Code (NFPA 99) have brought significant changes to the healthcare environment. The Joint Commission has revised and added standards in the Life Safety and Environment of Care chapters to align with the changes. This presentation will go over some of the more recent changes and provide information related to success during survey. We will also review the Top Ten most cited standards and discuss why they continue to be troublesome.

Rick Elder, BS, CHFM, CHC, Joint Commission Resources
Rick provides healthcare engineering expertise for organizations needing assistance in compliance with Joint Commission Standards. Mr. Elder also has extensive experience with the International Building Code, NFPA codes, FGI Guidelines, and other regulations related to the design and construction of hospitals and healthcare facilities. He has extensive knowledge of life cycle maintenance programs, system design, and operations for critical systems.

SESSION B
Reinventing Customer Service in Healthcare: Lessons Learned from the Best
Consumer-driven services in business and the need for efficiency are accelerating changes in the way organizations operate and compete.
Panelists TBA

SESSION A
Critical Power needs to meet NFPA/Joint Commission Requirements in the Healthcare Environments.

SESSION B
Telemedicine in Healthcare Delivery System
Telemedicine has become increasingly popular throughout the years. Its innovative benefits are vital interest amid the implementation of the Affordable Care Act.
Can we use architecture and design to create healthy spaces that promote patient health and wellbeing?

A growing body of evidence suggests architecture and design has profound effects on health and wellbeing in health care facilities. We can apply the growing understanding of our physiological and psychological relationship with our environment to practice better health care planning, design, and architecture to improve patients' experience, support resiliency, and ameliorate many negative health effects. We will explore research that reveals ways that planning and design can promote better health.

Bill Browning, BED Colorado University, MSRED MIT, Hon. AIA, LEED AP

Bill is one of the green building and real estate industry's foremost thinkers and strategists, and an advocate for sustainable design solutions at all levels of business, government, and civil society. To read more, click here.
