Keynote

Our work comes with a responsibility—to our clients, our environment, and our communities. We create spaces that have a strong sense of rootedness— that evoke an atmosphere enhancing how people move and feel. We use tools of artistry—concept, craft and expression. Articulating ideas through materiality, we see our work as an ongoing process: a collaboration. We must consider the impact of our designs on our natural and social environments. We work with sensitivity and restraint, and strive to craft innovative designs that set new standards for sustainability, improve day to day functioning, and create new possibilities for cultural engagement.

Trahan Architects is a design firm focused on mixed-use, cultural, educational, ecclesiastical, athletic, and assembly projects throughout the United States and overseas. Our offices are headquartered in New Orleans, with design studios in New York and Chicago.

Speaker

Robbie Eleazer joined Trahan Architects team in the fall of 2014, to follow his passion for finding new expressions of built form. His experience ranges from high rise developments in Miami to thoughtful performing arts projects in Atlanta, Arkansas and Italy.

As a leader in the computational design community, Robbie engages with technology to expand his understanding of what architecture can be and how it can impact people’s lives. His interests have led him to teach in Helsinki Finland, Rovinj Croatia, Los Angeles California, New York City and Lubbock Texas.

VISION is the “Architect’s Leadership Forum” of AIA Cincinnati, dedicated to professional advancement, firm development, and community outreach.
